Market Capture Ratio Comparison

Analysis period: 10 years
Generated: 09 Oct 2026, 22:20 India Standard Time
Primary source: AdvisorKhoj Market Capture Ratio

Funds analyzed

- Mirae Asset Large Cap Dir Gr — Equity: Large Cap
- Parag Parikh Flexi Cap Dir Gr — Equity: Flexi Cap
- SBI Large Cap Fund Reg Plan Gr — Equity: Large Cap

Ranking overview

Rank	Fund	Up capture	Down capture	Capture ratio
1	Parag Parikh Flexi Cap Dir Gr	80.00%	49.00%	1.64
2	Mirae Asset Large Cap Dir Gr	98.00%	93.00%	1.05
3	SBI Large Cap Fund Reg Plan Gr	93.00%	96.00%	0.98

Overall summary

The ranking is based on the 10-year capture ratio, where a higher ratio generally indicates stronger participation in rising markets relative to falling markets. Parag Parikh Flexi Cap Dir Gr ranks first with a ratio of 1.64, driven by a lower down-capture of 49.0% compared to an up-capture of 80.0%. Mirae Asset Large Cap Dir Gr ranks second with a ratio of 1.05, showing high up-capture (98.0%) and moderate down-capture (93.0%). SBI Large Cap Fund Reg Plan Gr ranks third with a ratio of 0.98, reflecting down-capture (96.0%) that slightly exceeds its up-capture (93.0%). Note that these funds belong to different categories (Flexi Cap vs. Large Cap) and use different benchmarks (Nifty 500 TRI vs. Nifty 100 TRI), which affects direct comparability.

Ranking methodology

Funds are ordered using AdvisorKhoj's reported Capture Ratio. A negative ratio is placed first only when it results from negative down-market capture with non-negative up-market capture; other non-negative ratios follow from highest to lowest, and other negative ratios follow them. A missing source Capture Ratio stops report generation rather than using a different metric. Benchmark and category differences still limit direct comparisons.

Rank 1: Parag Parikh Flexi Cap Dir Gr

Reason: Highest capture ratio (1.64) due to significantly lower down-capture (49.0%) relative to up-capture (80.0%).

Strengths: Low down-capture of 49.0% suggests limited participation in falling markets.; High capture ratio of 1.64 indicates favorable asymmetry between up and down market performance.

Limitations: Up-capture of 80.0% is lower than the other two funds, indicating less participation in rising markets.; Different category (Flexi Cap) and benchmark (Nifty 500 TRI) compared to the other funds.

Rank 2: Mirae Asset Large Cap Dir Gr

Reason: Capture ratio of 1.05, supported by the highest up-capture (98.0%) among the group.

Strengths: Highest up-capture of 98.0% indicates strong participation in rising markets.; Down-capture of 93.0% is slightly lower than up-capture, resulting in a ratio above 1.

Limitations: Down-capture of 93.0% is high, indicating significant participation in falling markets.; Lower capture ratio compared to Parag Parikh Flexi Cap Dir Gr.

Rank 3: SBI Large Cap Fund Reg Plan Gr

Reason: Lowest capture ratio (0.98) as down-capture (96.0%) exceeds up-capture (93.0%).

Strengths: Up-capture of 93.0% shows solid participation in rising markets.

Limitations: Down-capture of 96.0% is higher than up-capture, resulting in a ratio below 1.; Indicates greater participation in falling markets compared to rising markets.
