Market Capture Ratio Comparison

Analysis period: 5 years

Generated: 09 Oct 2026, 21:31 India Standard Time

Primary source: AdvisorKhoj Market Capture Ratio

Funds analyzed

- Mirae Asset Large Cap Dir Gr — Equity: Large Cap
- Parag Parikh Flexi Cap Dir Gr — Equity: Flexi Cap
- SBI Large Cap Fund Reg Plan Gr — Equity: Large Cap

Ranking overview

Rank	Fund	Up capture	Down capture	Capture ratio
1	Parag Parikh Flexi Cap Dir Gr	77.00%	58.00%	1.33
2	SBI Large Cap Fund Reg Plan Gr	91.00%	86.00%	1.06
3	Mirae Asset Large Cap Dir Gr	93.00%	92.00%	1.01

Overall summary

The provided funds span different equity categories and benchmarks, which limits direct comparability. A higher capture ratio generally indicates that a fund participated more in market gains relative to its losses during the 5-year period. Parag Parikh Flexi Cap Dir Gr ranks highest with a ratio of 1.33, reflecting lower down-capture (58.0%) relative to its up-capture (77.0%). SBI Large Cap Fund Reg Plan Gr and Mirae Asset Large Cap Dir Gr follow with ratios of 1.06 and 1.01, respectively, showing more balanced participation in both rising and falling markets against their respective benchmarks.

Ranking methodology

Funds are ordered using AdvisorKhoj's reported Capture Ratio. A negative ratio is placed first only when it results from negative down-market capture with non-negative up-market capture; other non-negative ratios follow from highest to lowest, and other negative ratios follow them. A missing source Capture Ratio stops report generation rather than using a different metric. Benchmark and category differences still limit direct comparisons.

Rank 1: Parag Parikh Flexi Cap Dir Gr

Reason: Ranked first due to the highest capture ratio of 1.33, indicating that the fund captured 77.0% of market gains while only participating in 58.0% of market declines over the 5-year period.

Strengths: Highest capture ratio (1.33) among the listed funds.; Lower down-capture (58.0%) suggests less participation in falling markets compared to its benchmark.

Limitations: Lower up-capture (77.0%) indicates less participation in rising markets compared to the other funds.; Uses a different benchmark (Nifty 500 TRI) and category (Flexi Cap), making direct comparison with Large Cap funds less straightforward.

Rank 2: SBI Large Cap Fund Reg Plan Gr

Reason: Ranked second with a capture ratio of 1.06, reflecting a balance of 91.0% up-capture and 86.0% down-capture over the 5-year period.

Strengths: High up-capture (91.0%) indicates strong participation in rising markets.; Moderate down-capture (86.0%) is lower than its up-capture, contributing to a positive capture ratio.

Limitations: Down-capture (86.0%) is relatively high, indicating significant participation in market declines.; Capture ratio (1.06) is lower than the top-ranked fund.

Rank 3: Mirae Asset Large Cap Dir Gr

Reason: Ranked third with the lowest capture ratio of 1.01, showing nearly equal participation in market gains (93.0%) and losses (92.0%) over the 5-year period.

Strengths: Highest up-capture (93.0%) among the listed funds, indicating strong participation in rising markets.

Limitations: Very high down-capture (92.0%) indicates substantial participation in market declines.; Lowest capture ratio (1.01) suggests the fund's performance closely mirrors its benchmark in both up and down markets.
